

LET'S TALK ABOUT VACCINES!

DO YOU LIVE WITH ASTHMA OR COPD?

» DID YOU KNOW THAT...

- Individuals with asthma or COPD are at higher risk of severe complications and death from vaccine-preventable illnesses due to their narrowed, mucus-filled airways?
- Non-vaccination increases the risk of developing secondary infections that may lead to permanent lung damage, pneumonia, worsening of the pre-existing condition and hospitalization?
- People living with asthma should be vaccinated against flu every year?
- Influenza can worsen the inflammation in your airways and lungs, and trigger asthma attacks or aggravate asthma symptoms?

» THE FOLLOWING VACCINES PROTECT YOU FROM THESE DISEASES AND OTHER COMPLICATIONS, AND OFFER YOU IMPROVED QUALITY OF LIFE:

INFLUENZA

COVID-19

PNEUMOCOCCAL

ROUTINE BOOSTER:

TETANUS, DIPHTHERIA
AND PERTUSSIS (Tdap)

» THINK ABOUT THE FOLLOWING QUESTIONS:

Do I know which vaccines I can get to protect me from preventable diseases and help me have a better quality of life?

When was the last time I received my vaccines?

Do I need to be vaccinated again if I already got vaccinated last year?

What can I gain from getting vaccinated?

How can a vaccine prevent my condition from worsening?

Do I have any concerns about the safety or the efficacy of vaccines?

ASK YOUR PHARMACIST FOR ADVICE ABOUT VACCINES!
